

BOEING FLIES AEROTUF'S LATEST AEROTHERM TEMPERATURE PROTECTIVE ULD ON ITS BOEING 777 *eco*DEMONSTRATOR

Boeing, the world's largest commercial airframe manufacturer, showcased AEROTUF's latest ULD innovation "AeroTHERM", on its ecoDemonstrator 777 in late November.

Boeing's ecoDemonstrator program provides customers with an opportunity to experience the latest and greatest in Boeing innovations that solve real-world challenges for airlines, passengers and the environment. The ecoDemonstrator 777 made its way to Germany where it was greeted by over 1,000 people keen to explore promising aviation technologies.

As part of this, AEROTUF supplied its brand new AeroTHERM "Extra Cool" Temperature Protective Container for testing and recording temperature and performance.

Romar Frazier, Boeing Ventures, said: "Sustainability is fundamental to the ecoDemonstrator program. We collaborate with partners such as AEROTUF to test technologies under real-life conditions in the air to accelerate innovation for the future of aviation."

Adam Barrington-Spencer, AEROTUF VP Sales & Marketing, said: "We're pleased to support Boeing and its continued push for excellence, innovation and a more sustainable future."

Today a 3rd of the world's food produced goes to waste, with 40% directly lost through the air cargo supply chain. This new Extra Cool AeroTHERM container, will help to reduce that waste, whilst improving handling times and saving on materials cost.

This latest innovation further demonstrates our commitment towards a cleaner environment, by delivering stronger, safer & greener ULD solutions."

Tom Pherson, AEROTUF President, said "This new Extra Cool AeroTHERM model, further expands our AeroTHERM range, delivering even greater insulation to help keep cargo cooler for longer, further reducing material and food waste, whilst maximizing durability thanks to patented technology".

ABOUT AEROTUF

Founded in 1998, AEROTUF is a leading provider of Stronger, Safer & Greener ULD solutions. From its manufacturing facility in Charleston SC, AEROTUF has delivered over 45,000 air cargo containers, serving over 25 customers world-wide, helping airlines create efficiencies and saving millions in fuel and repair costs. AEROTUF believes in a safer and cleaner sky and is committed to empowering the aviation industry by delivering stronger, safer and greener ULD solutions.

ABOUT BOEING

Boeing Commercial Airplanes, a business unit of The Boeing Company, is headquartered in Seattle, Washington and employs more than 60,000 people worldwide. Boeing is committed to being the leader by offering airplanes and services that deliver superior design, efficiency and value to our customers and a superior flying experience to their customers. Today, there are more than 10,000 Boeing commercial jetliners in service; airplanes that fly farther on less fuel, airplanes that reduce airport noise and emissions, that provide passenger-preferred comfort while delivering superior bottom-line performance to operators.
